DETAILED ACTION

The amendment filed on July 28, 2003, amending claims 1, 10 and 12-19, has been entered.

Claims 1-21 are pending.

The text of those sections of Title 35 U.S. Code not included in this action can be found in a prior Office action. Rejections and/or objections not reiterated from previous Office action are hereby withdrawn.

Election/Restrictions

Claims 11-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 10.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-3 and 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1652

Claim 1, which claims 2-3 and 5-7 depend from, is drawn to a method of producing polyhydroxyalkanoates using 1,4-butanediol. However, claims 2-3 and 5-7 are drawn to methods of producing polyhydroxyalkanoates using diols other than 1,4-butanediol. This rejection can be overcome by canceling claims 2-3 and 5-7.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Skraly et al.

Skraly et al. (U.S. Patent No. 6,329,183) teach a method of method of producing polyhydroxyalkanoates from diols with a diol oxidoreductase, an aldehyde dehydrogenase, acyl-CoA transferase, acyl-CoA synthetase, B-ketothiolase,

Art Unit: 1652

acetoacetyl-CoA reductase and PHA synthase (claims 1-16). Therefore, the teaching of Skraly et al. anticipates claim 10.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Skraly et al.

Skraly et al. (U.S. Patent 6,576,450) teach a method of method of producing polyhydroxyalkanoates from diols with a diol oxidoreductase, an aldehyde dehydrogenase, acyl-CoA transferase, acyl-CoA synthetase, B-ketothiolase, acetoacetyl-CoA reductase and PHA synthase (claims 1-16). Therefore, the teaching of Skraly et al. anticipates claim 10.

This provisional rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the copending application was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131. This rejection may not be overcome by the filing of a terminal disclaimer. See *In re Bartfeld*, 925 F.2d 1450, 17 USPQ2d 1885 (Fed. Cir. 1991).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 10 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9 and 16 of U.S. Patent No. 6,329,183. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are claiming common subject matter, as follows: methods of producing polyhydroxyalkanoates from diols with a diol oxidoreductase, an aldehyde dehydrogenase, acyl-CoA transferase, acyl-CoA synthetase, B-ketothiolase, acetoacetyl-CoA reductase and PHA synthase.

Claim 10 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9 and 16 of U.S. Patent 6,576,450. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are claiming common subject matter, as follows: methods of

producing polyhydroxyalkanoates from diols with a dool oxidoreductase, an aldehyde dehydrogenase, acyl-CoA transferase, acyl-CoA synthetase, B-ketothiolase, acetoacetyl-CoA reductase and PHA synthase.

Allowable Subject Matter

Claims 4 and 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
